

MUHAMMAD UMAR ZAMAN

Senior React Native Developer

umar.zaman6490@gmail.com | +92 312 5929649 | linkedin.com/in/muhammad-umar-zaman | Islamabad, Pakistan

PROFESSIONAL SUMMARY

Results-driven React Native Developer with 3+ years of hands-on experience building and shipping cross-platform iOS and Android applications on the App Store and Google Play Store. Proven expertise in mobile architecture design, Firebase integration, RESTful/SOAP APIs, real-time communication via SignalR, secure payment processing (Stripe, Moneris), and native module development. Experienced in leading development teams and independently managing the full mobile development lifecycle from requirements to production releases.

TECHNICAL SKILLS

Mobile Development: React Native, React, TypeScript, JavaScript (ES6+), Native Modules, iOS & Android

State Management: Redux, Redux Toolkit, React Context API, Performance Optimization

Backend & APIs: RESTful APIs, SOAP APIs, Firebase (Auth, Firestore, Cloud Messaging)

Maps & Location: Google Maps API, Native Location Module, Background Location Tracking

Payment Integration: Stripe, Moneris

Real-Time: SignalR, Sockets, Firebase Realtime Database

App Deployment: App Store & Google Play Store Submission, CI/CD

Architecture: SaaS Architecture, Multi-Module Design, Role-Based Access Control (RBAC)

UI/UX: Wireframing, Prototyping, User-Centered Design, Advanced UI/Animations, Mobile & Tablet Optimization

Collaboration Tools: Jira, Trello, Postman, Git

Other: Push Notifications, Deep Linking, App Localization, Multilingual Support

PROFESSIONAL EXPERIENCE

React Native Developer — HexaSynergy

Nov 2025 – Present

- Leading end-to-end development of a SaaS-based cross-platform mobile application, independently managing architecture, development, deployment, and ongoing maintenance.
- Designed and implemented scalable mobile architecture supporting Admin and User roles with secure, role-based access control (RBAC).
- Managing the full mobile development lifecycle including requirements analysis, sprint delivery, QA testing, and App Store / Play Store releases.
- Collaborating directly with stakeholders to translate business requirements into technical solutions, maintaining quality and delivery timelines.

React Native Developer — Bridge Zones Inc.

Sep 2023 – Oct 2025

- Developed and launched multiple production mobile applications available on both the App Store and Google Play Store.
- Integrated Google Maps, Firebase, SignalR, SOAP, and RESTful APIs to deliver enhanced real-time application functionality.
- Built and optimized background services to ensure seamless app performance on both iOS and Android platforms.
- Implemented secure payment gateway integrations using Stripe and Moneris to enable reliable in-app transactions.
- Led a team of mobile developers, conducting code reviews and ensuring efficient collaboration and on-time project delivery.

React Native Developer (Internship) — Devspot

Nov 2022 – Feb 2023

- Developed diverse mobile application features using React Native, focusing on high functionality and strong user experience.
- Gained hands-on experience solving real-world technical challenges within a professional development environment.

KEY PROJECTS

TechLeap – SaaS Mobile Platform

A scalable, Salesforce-like SaaS mobile and tablet application built with a multi-module architecture to support diverse business domains. The Real Estate module is the first implemented vertical, with additional modules planned for expansion. Features Admin and User interfaces with multi-role permissions, multilingual support, push notifications, and deep linking.

Stack: *React Native, Redux, SaaS Architecture, RBAC, RESTful APIs, Push Notifications, Deep Linking, Multilingual Support*

Exiride – Ride-Sharing App (Passenger)

Passenger-facing ride-sharing app enabling real-time ride booking, driver tracking, in-app chat, and seamless payment processing. Contributed to UI improvements and core functionality enhancements.

Stack: *Google Maps, Firebase, RESTful APIs, Payment Gateway, Real-Time Chat, Authentication, Location Tracking, SOAP APIs*

Exiride D – Ride-Sharing App (Driver)

Driver-side companion app for the Exiride platform providing ride management, real-time navigation, and background GPS tracking. Utilized native modules for deep platform integration.

Stack: *Google Maps, Firebase, Native Modules, Background Tracking, RESTful APIs, Chat, Authentication*

Bridge City Cabs – Ride-Sharing App

Full-featured ride-sharing application with real-time driver tracking, in-app chat, and integrated payment options, delivering a smooth passenger booking experience.

Stack: *Google Maps, Firebase, RESTful APIs, Payment Gateway, Chat, Authentication, Location Tracking, SOAP APIs*

Ex Cabs Driver – Local Taxi App

Built and maintained a full-featured native taxi driver application with real-time GPS tracking, ride distance calculation, secure user authentication, in-app messaging, and payment integration. Leveraged Google Maps, Firebase, and RESTful APIs to deliver a scalable, high-performance booking and ride management experience.

Stack: *Google Maps, Firebase, RESTful APIs, Native Modules, Authentication, Real-Time Location Tracking, In-App Chat*

Ex Cabs – Local Taxi App (Passenger)

Contributed to the development and enhancement of a passenger-facing ride-hailing application, implementing UI improvements and core features to deliver a seamless booking experience. Developed functionality for real-time ride booking, live driver tracking, secure authentication, in-app messaging, and integrated payment processing while ensuring smooth API integration and reliable performance.

Stack: *Google Maps, Firebase, RESTful APIs, Stripe, Real-Time Chat, Authentication, Location Tracking*

Bridge Zones Attendance App

Location-based employee attendance tracking application featuring Google Maps integration, background attendance logging, and interactive real-time attendance reporting.

Stack: *Location, Firebase, RESTful APIs, Authentication*

EDUCATION

Bachelor of Science in Software Engineering

Hazara University, Mansehra, Pakistan

Sep 2017 – Jun 2021
